

SCORM White Paper call

Abstract

Author: Yannick Warnier <yannick.warnier@dokeos.com>

Acts as: Software Engineer for Dokeos SPRL, company acting as principal developer of the Dokeos open-source e-learning software.

This document is written as a broad recommendation, with deep knowledge of SCORM 1.2 but very uneven knowledge of SCORM 1.3/2004.

Problem definition

The definition of SCORM 1.2 does not provide enough detail to clearly distinguish interactions and objectives in terms of learning pedagogy interests.

Use case

An LMS developer wants to implement SCORM 1.2 compliance into his LMS to a deep level. The information provided about interactions and objectives (and the optional inclusion of interactions into objectives) doesn't give him enough to make a clear and rock-solid implementation of both features at the same time.

Stakeholders

LMS developers

Proposed Solution

Provide more usage examples for interactions and objectives into the SCORM definition.

Integration and other technical issues

Not available

Existing implementations/prototypes

Not available

Summary and recommendations

Provide more usage examples for interactions and objectives into the SCORM definition.
